TeleMate.Net Software Deploys Revenue Management Solution for Global Offshore Oil and Gas Communications Service Provider

RigNet, a global offshore communications service provider, has selected TeleMate Unified Call Management to manage its communications revenue.

Norcross, GA – July 19, 2011 – TeleMate.Net Software, a global provider of voice network monitoring and Internet security solutions, announced today that the TeleMate® Unified Call Management product was chosen as the network revenue management solution of choice by RigNet (NASDAQ: RNET).

“As a global provider of remote communications services, RigNet selected TeleMate as a technology partner for managing our voice communications revenue because of their demonstrated success on a global scale,” stated Morten Hansen, Vice President of Global Engineering and Operations. “We determined TeleMate’s ability to seamlessly centralize call monitoring and invoice management ensured RigNet a solid footing in our growth strategy.”

RigNet is one of many businesses recognizing the enhancements made by the recent release of TeleMate Unified Call Management 6.0. In addition to traditional billing and invoice management features, TeleMate provides enhanced functionality other solutions lack, including real-time monitoring, trending of VoIP activities, identification of security breaches, services disruptions, and traffic anomalies.

“RigNet’s selection of TeleMate illustrates our increasing success,” stated John O’Reilly, President of TeleMate.Net Software. “TeleMate brings outstanding features and capabilities to the table. This deployment required a prompt and flawless implementation, with a product and professional services that exceed RigNet’s expectations. I am confident TeleMate has raised the bar for future technology purchases.”

About TeleMate.Net

TeleMate.Net® Software is a global leader in voice and data network monitoring and security solutions, which provides cost effective, reliable, and feature-rich solutions to service providers, corporations, and federal, state, and local agencies, creating unprecedented visibility within their complex IT networks, and allowing customers to spend less time collecting and monitoring data and more proactive time managing their overall business. Since 1986, TeleMate.Net Software has evolved its core reporting technology, incorporating the latest advances in database, reporting, user-interface, and categorization technologies, to become the dominate force in addressing telecommunications administrators core requirements.
