20 Most Promising Unified Communications Solution Providers 2016

Unified Communications (UC) in enterprises today is being driven by a mobilized workforce, aided by innovative technologies and a changing vendor landscape. However, a key impediment that crops up during the deployment phase of UC technology revolves around its integrability with existing applications within an enterprise. In a bid to establish a seamless and interoperable UC environment, companies often resort to expending huge amounts on replacing the software and hardware on the network. Forward-looking organizations have begun seeking UC solutions that enhance the productivity levels of their employees and facilitate a collaborative environment to transform the workplace.

UC solution vendors strive to provide customers with a fully integrated architecture and design flexibility that encourages a culture of cross-team collaboration within the enterprise, particularly while on-the-go. Enterprises attain value from UC solutions by embedding them directly into their business processes along with additional benefits like scalability, substantially,

reduced overhead costs, and unification of their business across geographies. This enabling of a unified enterprise workspace includes a balanced assortment of devices, operating systems, networks, and other applications.

With a multitude of vendors offering UC products critical to the business needs, it can be quite toilsome for CIOs to zero in on the right fit for their enterprise. In order to simplify and assist CIOs identify the right solutions providers, a distinguished panel comprising CEOs, CIOs, CTOs and analysts including the CIOReview editorial board has selected the top companies that are at the forefront of providing UC solutions. In our selection we looked at vendors offering a wide range of UC suites that will help in setting up a strong communication and collaboration platform for businesses. The companies featured here showcase in-depth expertise in integrated and innovative technologies to streamline operations across the Unified Communications field.
